

To the Commissioners:

Again from Mr. Reich comes another ill-conceived & not very well thought out proposal for the Commission. Like I recommended for the last one, reject RM-10641 out of hand and continue on more important work.

Mr. Reich's proposal is inconceivable at worst, and blurry at best. Does he expect to just explain in general terms what he wants the FCC to do, and leave it to the Commission to expend man-hours crafting sample changes to the CFR just to see if it's the way Mr. Reich likes it? The last time I checked, that wasn't the way ANY successful Petition for Rulemaking was created.

I'm all for shaping the Amateur Radio Service for the future, but creating new rules for superfluous issues isn't the way to do it.

I recommend that the Commission DISMISS RM-10641 as frivolous.

Sincerely,

Carl Swanson
